
Dear Sir/Ma,

TRANSFORM THE WAY YOUR COOPERATIVE IS MANAGED

E-COOPERATIVE SOLUTION

A growing cooperative needs more than committed members. It needs a system that keeps everything organized.

Managing a cooperative involves keeping track of members, contributions, savings, loans, repayments, transactions and important records. When these activities are handled through notebooks, spreadsheets, manual calculations or multiple disconnected channels, it can become difficult to maintain accurate records and provide members with timely information.

Prowbys provides a smarter way to manage your cooperative.

The Prowbys E-Cooperative Solution is a digital platform designed to help cooperatives simplify their operations, improve record management and give members convenient access to important cooperative services.

With the platform, your cooperative can bring key activities into one organized digital environment while reducing the administrative burden on executives and management.

With Prowbys E-Cooperative, you can:

- Register and manage members digitally
- Maintain centralized member records
- Manage member contributions and savings
- Track loans and repayments
- Monitor individual member transactions
- Manage cooperative payments digitally
- Provide members with access to relevant account information
- Generate reports for management
- Improve communication with members
- Reduce dependence on manual records and calculations

What does this mean for your cooperative?

Better records. Easier administration. Greater transparency. Faster access to information. And a more convenient experience for members.

Whether you operate a staff cooperative, community cooperative, traders' cooperative, professional cooperative, farmers' cooperative, housing cooperative or another type of cooperative, the Prowbys E-Cooperative Solution can be configured around your cooperative's structure, rules and operational requirements.

More than putting your cooperative online. We're helping you build a better way to operate.

We would be pleased to demonstrate the Prowbys E-Cooperative Solution and discuss how it can be adapted to your cooperative's specific needs.

Let's build a smarter, more transparent and more efficient cooperative.
